

EMPLOYEE HIPAA COMPLIANCE SIGNATURE FORM

My Commitment to Compliance:

I have completed HIPAA compliance training offered by The Medical Group of New Jersey. I understand our facility's employee HIPAA compliance program. I agree to do all I can, within my area of responsibility, to maintain up-to-date knowledge about federal and state laws and our HIPAA compliance program. I will comply with these requirements to the best of my ability, and to immediately let the compliance officer know if there is any area where I feel our office is not in compliance with these laws and program requirements. Our policy is a simple, yet powerful four step process: (1) keep up to date, (2) educate, (3) comply, and (4) audit/correct.

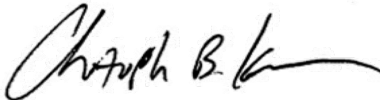

Our facility's commitment to employees:

- a. We seek to maintain up-to-date knowledge about federal and state law pertaining to the protection of our patients' Protected Health Information (PHI).
- b. We educate our employees and keep them up to date about federal and state law as it applies to Protected Health Information.
- c. Our policy is to comply with all federate and state law governing Protected Health Information.

We desire that all our employees are particularly cognizant of the fact that protected health information must be treated with utmost attention, accuracy, honesty, and integrity. We seek to educate and carry out these policies with all our employees, managers, clinicians, and where appropriate, contractors and other agents.

I agree with my employer's HIPAA policies and will do all I can to comply with all regulatory laws pertaining to personal health information. I understand that our office has an open-door policy and I may discuss any problems I feel may occur with PHI without worry of recourse by my supervisor or other supervisors.
